## EXPERIENCE

### Full Stack Software engineer, Macedonia, KI

- Present

- Created many applications for many clients
- Participated in building different responsive and modern web applications while using good practice with a team of developers
- Created full stack web-applications with a fluent semantic structure
- Applied agile methods such as SCRUM for project management

## SUMMARY

A full-stack software engineer with high interest and experience in the Health and Fitness industry, high creativity, and skills in software engineering. Have created many successful front and back-end web applications. Looking to show my skills to a global reach tech company.

## SOME OF MY PROJECTS

### 1. Golden Honey

- Designed and developed a full-stack honey application store where people can view our products, honey farm and also buy honey.
- Implemented threeJS, Stripe payment method, created a way to collect emails in a database so I can build an email list.
- Used React on the front-end, with an Express and MongoDB back-end.

### 2. Live Weather

- Built a live weather web application that allows users to search different worldwide locations, and see the momental weather in that location.
- Used a weather API, to get the weather data for each location in the world.
- Used React on the front-end, with Node and Express in the back-end.

## SKILLS

HTML

CSS

JavaScript

Git

Node
